

Our Curriculum and Training program includes content experts, trainers and researchers who specialize in developing curriculum, instruction, and systems to support adult learning.

We're committed to collaborating across workforce and education systems because we envision a future where all learners reach their highest potential. The curriculum and training team researches the best practices in instructional design and creating curriculum and experiences.

We want to ensure that we are creating high-quality, inclusive, and accessible learning experiences and materials. We want to be on the cutting edge of innovation in everything that we do.

We provide a full range of learning supports to a variety of systems and provider organizations, including state-level government agencies, schools, and colleges, direct service providers and businesses.

The Curriculum and Training team provides experiences to support adult language learners, folks who might be pursuing basic education, or even adults who are in a career along the pathway looking to continue their education, maybe to advance to the position.
